### SYNOPSIS

*Anatomy of Ordinary Crimes exposes the devastating impact of cyber violence and online abuse on our lives and society, revealing one of the most dangerous phenomena of our time.*

The reality of online violence unfolds through the deeply human, interconnected stories of four women – three from Romania and one from Belgium – whose lives are irrevocably changed by cyber violence and

abuse. Despite their different cultural and generational backgrounds, they recognize their shared experiences and come together to break the silence surrounding the “ordinary crimes” of online violence, hate and sexual abuse.

The film reveals how a collective mentality continues to turn a blind eye to this trauma, refusing to acknowledge it for what it is: sexual abuse. At its heart, their fight for justice is a struggle to reclaim their fundamental rights to dignity and privacy.

### ORGANISER & PARTNER:

The cine-debate is organised by **CinEast festival** in collaboration and with the support of the **European Commission's 'Eyes Open' campaign** and the participation of the **EC Representation in Luxembourg**.
